THE FUTURE KID'S SCHOOL

(Affiliated to the Council for the I.C.S.E. Examinations, New Delhi)

Director's Desk

The pursuit of excellence is a dynamic responsibility which must be addressed with adequate gravity and commitment by all the three vertices of the triangle of learning, the parents, the school and the students. The world is

constantly in a state of flux. We are enforced to adapt to a rapidly changing social, cultural, ethical and ideological environment. Hence it is very vital for schools and parents to establish and nurture core values and life skills crucial for meaningful existence. There is a constant need to develop a conducive learning environment to empower our students with self esteem and confidence.

The technology has marked a wonderful facet of the human invention through which its delicacies are outstretched and set a measuring bar to the ignited minds. As a result, the fraternity of pedagogy at the FKS always induces conscientious osmosis into the amazing minds of the grooming individuals at their tender ages. The systematic approach of the all-round facets always makes the futurites to foster the confidence and invade the competitive world with truthfulness and uniqueness.

*"Education is our passport to the success,
for tomorrow belongs to the people who prepare for it today."*

(Ravi Babu Yeleti)
Director

Principal's Message

We, at FKS, believe in nurturing a child in the radiance of the FKS philosophy and Vision summed-up in the school motto "Excellence in Education and All-round Development". The school curriculum is so designed that one gets engaged in the process of creating oneself with clarity of what one wants to be. We strongly believe that a futurist is a king/queen who is manifested in correctness and precision of speech, refined, gentle and self well-equipped with the power and the habit of reflection and growth. A future, grows to be a world leader with a strong mind and a sensitive heart ready to confront and win over the ever changing and challenging world.

The policy of the Future Kid's School is to dispense quality and meaningful education for all the students by which the school has become an ideal institution with professional expertise in the field of education which is essential to meet the growing and the challenging needs of the future citizens. Hence, the children of various hidden talents are highly appreciated in the FKS. Our management and the teaching staff always remain unfazed by success and laurels and are working incessantly with dedication to expand the horizons of knowledge and education to all segments of our society irrespective of caste, community and religion.

R. Ravindranath

(R. Ravindranath)
Principal

"If you can dream it you can do it."

- Walt Disney

AN AMARANTHINE

SHRINE OF KNOWLEDGE

EMPIRICAL

EXPOSURE

The contemporary reality of the 21st century solicits the experiential education while concentrating on the subtle facets and the canons of the respective perspectives. The more the child experiences the better the child interprets and puts into practice with more clarity. In order to cater towards the ultimate levels of comprehension among all the students, The Future Kids has set up all the facilities through better infrastructure to make the children to practice under the expert auspices. The chemical bonding, principles of gravity, the wonderful art of speaking and listening, measuring the heights and distances, programming the complex languages of the computers are made very possible to be experienced in an easy manner with the inclusion of English Lab, Physics Lab, Chemistry Lab, Computer Lab and Biology Lab. They have navigated them to brainstorm on all the possible outcomes of the theoretical knowledge which was dual in the typical integration of pedagogy.

EMPIRICAL EXPOSURE

A MACROCOSM OF
ECSTATIC
PERSPICACITY

*"A student of life considers
the world a classroom."*

EFFICACIOUS

12

EUPHORIA

The holistic development of the children is made functional by engaging them in multitudinous expertise. The enmeshing efficacy enhances the levels of engrossment with the adroitness and the agility of the thought process of the child. This phenomenon expedites the vigor of participation and penetration. Based on the above assumption FKS supports the children with all sorts of activities such as badminton, chess, skating, yoga, music

and dance. These activities made them to cherish the valuable learning sessions of the childhood and proved them to be the supreme among the others. Through these activities FKS inscribed a remarkable impression on the child's holistic development. The accolades won by the children through the exposition of the activities aroused the spark of inspiration among the student fraternity.

13

EFFICACIOUS EUPHORIA

*"Winners don't do different things,
they do things differently."*
- Su Kham

ENSHRINING JUNCTURE

Moulding the tender minds has been an experiencing and enthralling task in the FKS. The cognitive reinforcement of the little ones is always to be designed by an umbrageous and pragmatic ideology. This is the basis on which the mentors who ignite the spark of the beginners try to set their goals with adroitness and empiricism. Every concept is imbibed and inscribed in a manner which guides the children to confront the demands of the promising manifold of knowledge and wisdom. All the children are made the constituents of peer learning and are acclimatized to mould their holistic sense through the utilitarian enterprise.

JUBILATING DUODENARY EPOCH

Dreams are inspiration for life. Success is a combination of 'talent vs nurture'. A child may be born with average thinking potential but our PPS is an arena where nurturing through a rich environment, full of education and challenges takes place. That day was the twelfth foundation day when we were ignited with such an important and amazing experience after having traversed through a long period of 12 years. A legendry behind this has to be thanked for his open heart, inciting patience and inner strength.

SWORN DECLARATION

*'Do not follow where the path may lead,
go instead where there is path and leave a trail.'*

The selected students are the trail blazers, the innovators, the torch – bearers, the leaders, the chosen few upholding the values. They are like the beacon occupying the most coveted positions, providing direction to their friends and juniors, aiding the smooth governance of the school. They comprise the elite school senate.

On 9th July, 2013 the school witnessed the solemn investiture ceremony, where the institution formally invested the newly appointed office bearers, selected on the basis of their outstanding performance in academics and other creative abilities. The entire team of office bearers vowed to be the architects of the future and builders of a collective vision, thereby leaving behind a legacy for all to cherish.

EDIFYING

ERUDITION

"The Cultural Unity forms a Nation ."

India is a land of many religions and many cultures, each of which has its own important festivals. It is a land of ethnic groups, hundreds of languages and dialects, numerous modes of dressing, countless traditions, beliefs. The theme of cultural unity is blazoned in the FKS by celebrating all the festivals like Vinayaka Chaturthi, Eid-Ul-Fitr, Dusshera, Rakshabandhan, Diwali, Christmas, Pongal, and many more ceremoniously. All the children were elated with these effervescent celebrations which inculcated the slogan of Unity in Diversity among the children.

EDIFYING ERUDITION

ENRICHING ERUDITION

"A Nation's Culture resides in the heart and in the Foul of the People"

FASCINATING CRUSADE

Field trips are an integral part of our curriculum. They bring children out of their routines and give them the opportunity for meaningful educational experiences. When students go on field trips, they are taught by professionals rather than their regular teachers. They are brought out into the community to interact with the expert in their fields. By going on field trip, concepts become more concrete and learning becomes permanent. We have taken our kids to various places such as Police Station, Fire Station, Post Office, Cotton Museum, Coke Bottling Unit, Porcelain Industry, Sun Temple at Bikkavolu to enrich their knowledge.

FASCINATING CRUSADE

EXCITING EXPEDITION

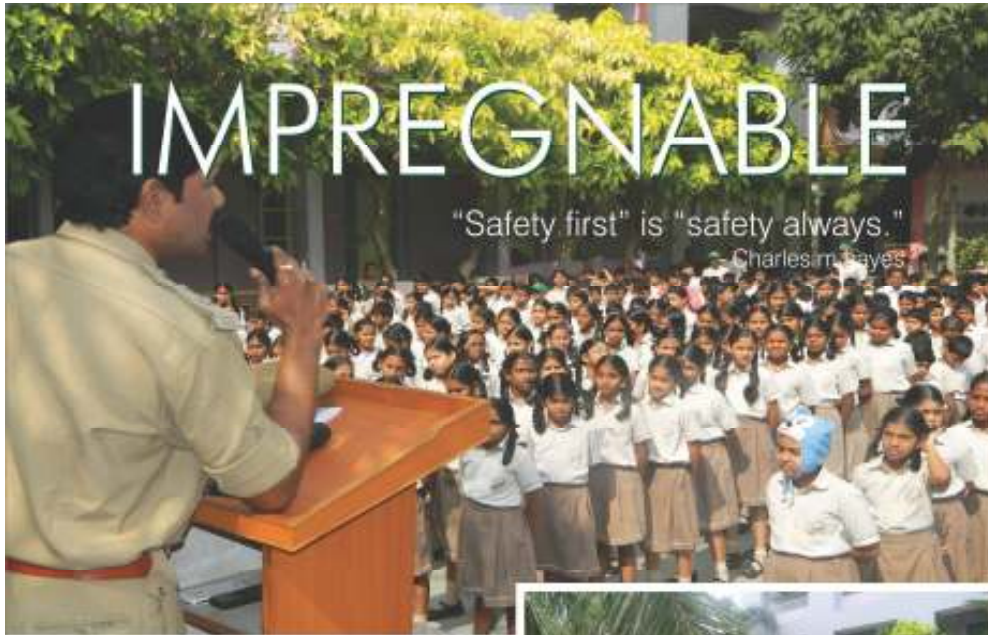

We the Future Kid's provides a better exposure of various dimensions of education in exploring and entertaining manner. As a part of educating the children FKS believes in the aspect of embarking through various voyages to various places of industrial and historical importance. Through these tours all the futurists embellished their knowledge sent through wonderful sessions of discussion and brain storming. Many students were escorted to explore new places and gained a dreaming experience through them.

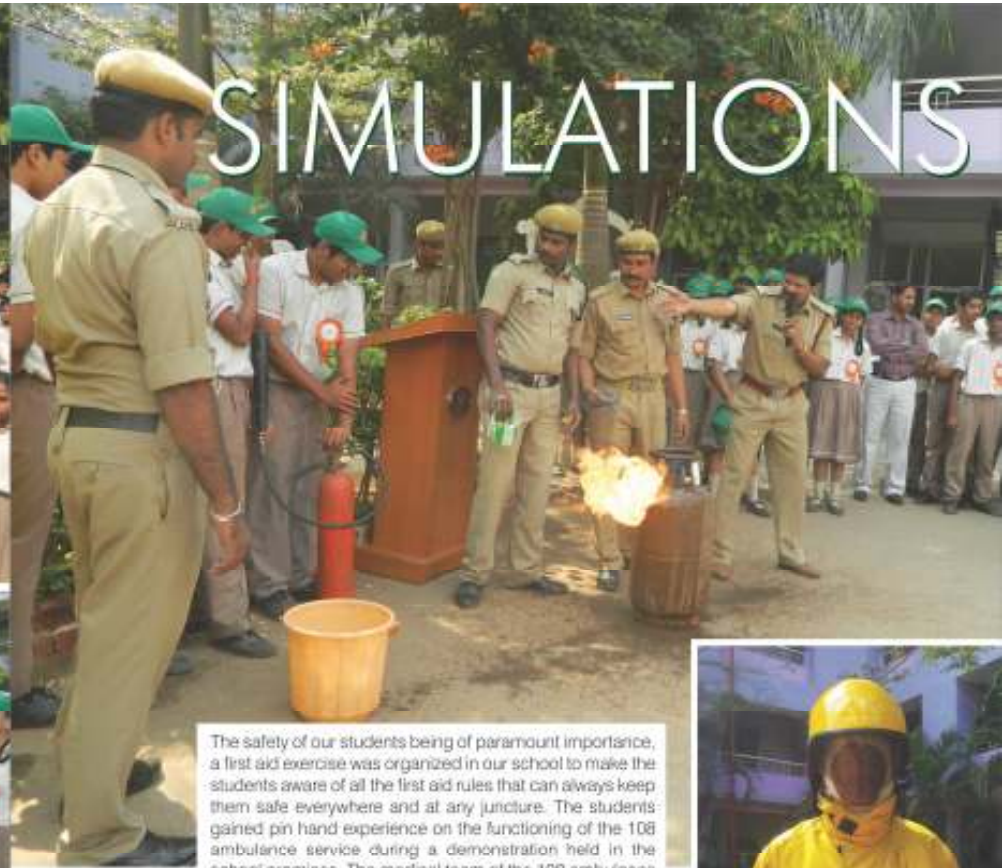

IMPREGNABLE

"Safety first" is "safety always."
- Charles M. Hayes

SIMULATIONS

The fire accidents being quite common in the present day's scenario, it deemed mandatory to acquaint the students with fire fighting techniques to be followed in case of any eventuality. The personnel of the local fire fighting station graciously agreed to visit our school and give a demonstration of the various fire fighting techniques involved in case one confronts a fire mishap.

The safety of our students being of paramount importance, a first aid exercise was organized in our school to make the students aware of all the first aid rules that can always keep them safe everywhere and at any juncture. The students gained pin hand experience on the functioning of the 108 ambulance service during a demonstration held in the school premises. The medical team of the 108 ambulance service explained the facilities available in the ambulance for treating patients in case of an emergency.

To inspire the futurists: a series of programs which aid the nuances of comprehension were conducted. They include the wonderful proceedings, intellectual share of knowledge, workshops by the elite in the industry. Many techniques were discovered and are made to be implemented in an approachable manner. A variety of techniques which are required to procure during the voyage of seeking knowledge & wisdom were made to be

TRANSITIONAL JUNCTURES

RADIANT EXTRAVAGANZA

Children's day was celebrated on 14th November in a boisterous manner. Students enthralled the audience with their exhilarated performances.

Competitions were conducted in various categories like sports as well as activities. All the winners were bestowed with top notches for their best performances.

IMPERISHABLE ANAMNESIX

Teachers are the facilitators who ignite the spark of reasoning and help the children to find their inborn talents. The wonderful team of teachers at FKS always feel proud to cater their every moment towards the child's development. All the teachers are very close to the tender hearts of the children. It's a tradition every year to pay the regards and get blessed by organizing various programs that make the teachers to have an enjoyable experience.

ENCAPSULATING THE EXPERTISE

To give the inborn spark of competition and keeping in mind the future challenges, building a strong foundation, enhancing the students' optimum performance the competitions like group discussions and simulations boost their confidence. The students have also put both their soul and zeal in proving themselves.

Our school sparkled with voluminous dye decorations pertaining to the creativity programs on the eve of Diwali. The strenuous effort of the children in decorating diyas was a silent exponent of different communities amalgamating in the joyous celebration of Diwali. Through these celebrations we can provide rich and stimulating environment in which the child can grow and learn.

INCANTING THE ARDENT PATRIOTISM

India is a vast country and a land of multiplicity. In order to uphold the principle of oneness among the people belonging to one nation, we celebrate our national festivals: the Independence Day and the Republic Day. There is a basic unity which runs through life and thought of every Indian. We are proud to say that we are Indians.

SLOGANING FOR A NOBLE CAUSE

The activities should be challenging rather than being frustrating. In this scenario, the school setting provides a structured atmosphere in which activities enhancing the physical health are incorporated. Improved self-confidence and an overall sense of well-being advocates the children. Through a better activity of skating our team of skaters has raised a slogan for the cause of unity. Skating is one of the forms of activity which enables the hidden talent to be presented very tactfully.

SPORTS QUIZ

Needless to say, the excellence of human mind depends on how well fed and healthy the entire body is. In such stressful, hectic and sprinting lives, people and even the children are disinclined towards the physical exercises; therefore, arises a need for stimulation which can entertain as well as keep us healthy. Books develop our mind, but games develop our body. The value of sports and games is recognized by all the educationists today.

Apart from giving them excellent leisure, they help them to inculcate several other important traits like sportsman spirit, leadership qualities, team spirit, enhanced tolerance, endurance and stamina. In this endeavour, to arouse much interest and enthusiasm among students about sports and games, FKS team has conducted "Inter House Sports Quiz" for the students of grade 8 and 9. Questions about famous sports personalities, various kinds of sports and games, medals won, stadiums etc. were posed to the students in different rounds like buzzer round, audio visual round, rapid fire round etc. Students took part enthusiastically and showed their vigour and interest towards sports and games.

SPELL BOUNDING ENTRADA

INDIA SPELL BEE, conducted by Sakshi TV, is a spelling competition for the students across major cities in India which creates an awareness of the necessity to spell and the need to pronounce words correctly. It also develops enthusiasm amongst students to learn new words.

Zonal level

We feel proud to announce that our school was selected as the centre for conducting zonal level India spell bee organized by Sakshi TV. Approximately 900 students took part at different levels. The FKS team has planned and made adequate arrangements in such a way that the event went on flawlessly.

Final Round

All the long hours of hard work and dedication of both the students and teachers has brought the fruit of success in sending fine students in maximum number to the Sakshi Spell Bee competition. Someone has rightly said that success is not winning but learning not to repeat the mistakes. All the fine students gave tough competition to the rest of the participants and stood in the first five places. Today we are proud to say that these students are now like itinerant lexicons learning nearly 20,000 English words.

EXPLORING THE ACUMEN

In the craze of pursuing B.Tech or any equivalent degree languages are being neglected in the present day educational system. The so called corporate methods of teaching can never arouse interest in learning languages. But here in FKS, it is completely different. In our school, we can proudly say that children don't just learn language but they enjoy learning it. It is only their enthusiasm which made them to exhibit a "Hindi Project Work Show" on an open house day. Without the help of any teacher, students made the projects from their lessons. The way the projects were made innovatively, and the explanation of the same in Hindi shows their comprehension levels and communication skills in our national language. This Project Work Show depicted that learning language is no more boring at FKS.

SPECTACULAR MANIFESTATION

The more we experience, the more we can interpret. Visualization and practical programming advocate the children to grasp the nuances of the learned aspects. Science is such a dimension of education which demands to take the concept through experimental learning and presentation. The FKS through its team of research and development, always try to module the learnt knowledge by organizing science fairs and exhibitions. These programs made us to showcase the blend of knowledge through its wonderful presentations that enabled everyone to group the scientific knowledge.

EXQUISITE INTERSECTION

FKS always sharpens the various dimensions of the children by making them involved in various creative works. Through these, the creativity of the child gets moduled in a systematic manner. This approach heightens the imaginative inter phase of the child and presents an overall exposure in all the dimensions in addition to academics.

Every year all the children come out with various models of Socially Useful Productive Work (SUPW) and exhibit them by conducting an Art Exhibition which is always appreciated by the parents and the viewers for innovative exemplification.

SAYONARA DE PHILOS

FACILITATING FRATERNITY

The Teaching Fraternity of FKS always proved to be the best in moulding every subtle facet of the child. The team of teachers is always rejuvenated by replenishing themselves through various discussions and sessions to exchange the knowledge know-how. It is with these approaches FKS is always considered to be a Knowledge Hub.

TELUGU BASHA DINOTSAVAM

FKS always facilitates the children to develop their keen interest towards the language English, whereas on the other hand the school always maintains high standards of regaining and respecting the mother tongue Telugu. All the children were given very good insight on the Telugu Language and its origin. Many accolades were presented to the children who excelled in the various competitions. The children of FKS always proved to be multi talented linguists.

VIBRANT VIBGYOR

The ignited instincts of the incumbent souls impressed the thirst of the august gathering through the Taal Encore. It showcased a series of dance and music forms that inscribed an everlasting inscription on the mindset of the elated audience. It presented a fashion show which admired the ardent need for maintaining good health. It even mesmerized the audience through wonderful drama of Krishna in an art form, which highlighted the peaks of the cultural fiesta. Taal Encore laid an indelible impression on the minds of the parents and was complimented for its elegance.

Chairperson's Message

We the humans are always termed to be wonderful creation of God. With all His mighty power he bestowed upon us the very vital component "the intelligence" - that accommodate the capacity to groom every sensitive aspect. With its advocacy we can win through many a challenge which arouse in the journey of our life.

Childhood is a phase of metamorphosis that energizes and makes us to experience the rudimentary aspects of the life.

Consistent industry and perseverance makes every child to excel in any task. We the family of FKS ignite the spark of intellect among our children and aspire them to inspire the generations to compete through creating opportunities.

Vijaya Kumari Yeleti
